These chapters are not officially released by Kamibana and are only posted on their livejournal to give a preliminary translation. They ask that these not be posted on any manga sharing websites, because these are only works in progress and not their official releases. Please respect their wishes. I've chosen to include them in this archive because this is an archive of all English Loveless content that I could find available on the internet, and the WIPs are part of that and are also very important to the story as it stands in June of 2017. When this is being written.

Contact Dave at lovelesswiki@gmail.com for questions, comments, and concerns.
